SUMMARY

Full-Stack Software Engineer who has shipped three production-grade applications end to end — a Spring Boot survey platform with nested relational data models, a Dockerized personal portfolio, and an AI-integrated travel planner using the Google Gemini API. Comfortable across the stack: Java/Spring Boot on the backend, React/TypeScript on the frontend, PostgreSQL and MySQL for data, and Docker for deployment. Eager to bring the same ownership and attention to clean architecture to a full-time engineering role.

EDUCATION

Tontadarya College of Engineering	2022 – 2026
<i>B.E in Computer Science and Engineering</i>	Gadag
Swami Vivekananda PU College	2020 – 2022
<i>Science (PCMB)</i>	Hulkoti

PROJECTS

FormCraft Dynamic Survey & Quiz Builder · Java, Spring Boot, JPA, PostgreSQL, JavaScript, CSS3	2026
https://form-craft-52n3.onrender.com/	

- Architected a full-stack survey-builder SPA enabling users to create multi-type forms, distribute shareable links, collect submissions, and view real-time analytics – serving live traffic.
- Built a Spring Boot 3.3 REST API (Java 21) with Spring Data JPA & Hibernate to persist nested entity graphs (Surveys → Questions → Options → Responses → Answers) using PostgreSQL in production and H2 for local development.

Developer Portfolio Website · React, Java, Typescript, TailwindCSS, Docker, Render	2026
https://vivek-odugoudar.vercel.app/	

- Interactive Frontend: Designed a responsive portfolio featuring staggered hover animations and an interactive brand-colored skill canvas to elevate user engagement.
- Resilient Form Pipeline: Integrated a contact form pipeline using FormSubmit's AJAX API for instant email delivery, backed by local JSONL persistence.

MargaDarshi - AI-Powered Travel Planning Platform · JavaScript (ES6+), Leaflet.js, Tailwind CSS, Google Gemini API	2026
https://vivek1334.github.io/Margadarshi/	

- Built a responsive, zero-backend travel exploration platform integrating live weather telemetry, verified landmark data with imagery, and location-aware destination search across mobile, tablet, and desktop.
- Implemented real-time weather via the Open-Meteo API, interactive maps with Leaflet.js, and a floating AI chatbot for personalized travel recommendations and local phrasebook audio.

EXPERIENCE

Java Development Trainee	February 2026 – August 2026
<i>Tap Academy</i>	Bengaluru, Karnataka

- Built end-to-end full stack web applications using React (frontend) and Java with Spring Boot in a professional on-site training environment.
- Designed and implemented relational database schemas in MySQL, enhancing data integrity and optimizing queries, resulting in improvement of query performance.

SKILLS

Languages	Java (SE 21), JavaScript, Typescript, SQL, HTML, CSS
Frameworks & Libraries	Spring Boot, Hibernate, React, Node.js, Tailwind CSS, Vite
Databases & Tools	PostgreSQL, MySQL, H2 In-Memory Database, Git, GitHub, Docker, Render Cloud
Core Concepts	RESTful API Design, OOP, Data Structures & Algorithms
Soft Skills	Collaborative, Maintainable code, Passion for learning
